CDER
Center for Parallel and Distributed Computing Curriculum Development and Educational Resources

Grant and Training Program for Parallel and Distributed Computing Curriculum Adopters
August 5-9, 2019

See how to integrate PDC into data structures and algorithms classes and evaluate experimental pedagogical approaches for publication

Learn about PDC from experts

Network with other instructors

Gain insights for incorporating PDC into your courses, to meet the needs of your students

Become a leader in preparing students for careers that require concurrency as a fundamental aspect of computational thinking

Get special opportunities to publish findings from your work, and attend major conferences

Where?
University of Maryland, College Park

How?
Two ways to participate: $5000 grant, with commitment to implement and evaluate course enhancement, or travel support for workshop attendance with no other commitment

Who?
Instructors teaching introductory computing courses at colleges and universities in the US
