CDER
Center for Parallel and Distributed Computing Curriculum Development and Educational Resources

Grant and Training Program for Parallel and Distributed Computing Curriculum Adopters

July 25-29, 2022
Application Deadline: April 15, 2022

University of Massachusetts, Amherst
At this time, proof of COVID vaccination is required for participants in on-campus activities

Where?

$5000 stipend ($3000 awarded on completion of training, $2000 once the course enhancement, has been submitted for publication)

What?

Instructors teaching introductory computing courses at colleges and universities in the US

Who?

Sponsored by:
UT San Antonio, University of Maryland, University of Massachusetts, Tennessee Tech, Louisiana State University, IBM, Intel

See how to integrate PDC into introductory classes and to evaluate experimental pedagogical approaches for publication

Learn about PDC from experts

Network with other instructors

Gain insights for incorporating PDC into your courses, to meet the needs of your students

Become a leader in preparing students for careers that require concurrency as a fundamental aspect of computational thinking

Get special opportunities to publish findings from your work, and attend major conferences
