Center for Parallel and Distributed Computing
Curriculum Development and Educational Resources

Grant and Training Program for Parallel and Distributed Computing Curriculum Adopters

July 25-29, 2022

Application Deadline: April 15, 2022

- See how to integrate PDC into introductory classes and to evaluate experimental pedagogical approaches for publication
- Learn about PDC from experts
- Network with other instructors
- Gain insights for incorporating PDC into your courses, to meet the needs of your students
- Become a leader in preparing students for careers that require concurrency as a fundamental aspect of computational thinking
- Get special opportunities to publish findings from your work, and attend major conferences

University of Massachusetts, Amherst

At this time, proof of COVID vaccination is required for participants in on-campus activities

Where?

\$5000 stipend (\$3000 awarded on completion of training, \$2000 once the course enhancement, has been submitted for publication)

What?

Instructors teaching introductory computing courses at colleges and universities in the US

Who?
